Buyers

Digital transformation means reimagining the value streams and processes across all business functions. Our platform solution empowers you in your journey towards a more agile, risk-aware and collaborative procurement and merger & acquisition related and optimized ecosystem.

why? Modern high-performance supply management increasingly relies on data consistency of aggregated information from all parties involved. Titan MIS increases transparency, efficiency, and associated savings for your organization.

how? Titan MIS is plug-and-run. Standalone without the need for endless system integration projects. Expand instantly your capabilities for supplier discovery, data transparency, risk, contract and rate card management and collaboration: Complementary to your existing e.g. source-to-contract, purchase-to-pay or risk management systems.

Suppliers

We provide best-in-class supplier information to potential buyers and help suppliers to streamline their buyer interactions.

why? The future of sales management is based on integrated platforms that connect organizations with diverse buyers, minimize administrative efforts, and open opportunities for new sales. Titan MIS increases efficiency and market visibility for your organization (and is compatible to CRM system's)

how? Our platform provides a central data source for companies to scout, evaluate, compare and collaborate with other parties. All data, ratings, and benchmarks are delivered from companies, trusted data feed providers, and Titan itself.
